PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of hands-on experience building web applications and SaaS platforms using React, Node.js, Express, and MongoDB. Founded and architected Apex Proxy, a fully functional SaaS platform for high-speed 4G/5G mobile proxies. National finalist in WorldSkills UK 2021 for Web Design & Development. Holds a BSc (Hons) in Computer Science from Manchester Metropolitan University (2025). Passionate about building reliable, scalable systems across the full stack, from database design and REST APIs to responsive front-end interfaces and cloud infrastructure.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, UI/UX Design, Figma, Prototyping, Photoshop, SEO

Backend: Node.js, Express.js, Python, Java, REST API Design, MongoDB, Redis, C#, WebSockets, System Architecture

Infrastructure & DevOps: Docker, VPS Management, CI/CD Pipelines, GitHub Actions, Infrastructure as Code, Nginx, FRP Tunnels, 3proxy

Networking & Protocols: HTTP/HTTPS, SOCKS5, TCP/IP, Serial Communication (AT Commands), IP Rotation, Proxy Management

Testing & Tooling: Automated Testing, Git, GitHub, Agile/Scrum, FFmpeg, CLI Tool Development, npm

EXPERIENCE

Full Stack System & Web Developer Mar 2025 – Present

Apex Proxy (Personal Venture) | UK / Italy

- Designed and built a fully functional SaaS platform for high-speed rotating mobile proxies powered by 4G/5G dongles, developed independently as a personal venture.
- Built backend services with Node.js, Express, and MongoDB covering user authentication, subscription management, and real-time usage tracking.
- Developed a React admin dashboard for live monitoring of dongle status, proxy performance, and client activity.
- Architected multi-node scaling using VPS and FRP tunnels, providing reliable global access and reduced latency across regions.
- Integrated 3proxy for secure proxy management supporting both HTTP and SOCKS5 protocols with per-user authentication.
- Automated USB dongle detection, configuration, and IP rotation to maximise uptime and connection speed.

Barista / Team Member 2023 – Present

Starbucks | Manchester, UK

- Nominated for Best Partner across the entire North West region, recognising consistent excellence in customer experience and team contribution.
- Managed high-volume service during peak hours, demonstrating strong time management, reliability, and composure under pressure.
- Trained and supported new team members, developing communication and mentoring skills transferable to technical environments.

Contracted On-Call Developer 2026 – Present

Private Client | Manchester, UK

- Retained on a monthly contract basis to provide on-demand development support for a private client, acting as an embedded technical resource.
- Deliver ad-hoc full stack solutions across front-end, back-end, and infrastructure as requirements arise.
- Maintain ongoing familiarity with the client's codebase to respond quickly and effectively to new requests.

Freelance Web Developer & Social Media Manager 2022 – Present

Self-Employed | Manchester, UK

- Designed and developed websites and web applications for various clients including small businesses and startups, delivering responsive, SEO-optimised builds.
- Provided social media management for multiple clients across Instagram and Facebook, growing engagement and maintaining brand consistency.
- Managed full project lifecycle from client briefs and wireframes through to deployment and post-launch support.

Digital Technician 2019 – 2020

Oldham College | Manchester, UK

- Provided technical support to students and staff, troubleshooting hardware and software issues across laptops, desktops, and peripherals.
- Performed system updates, data backups, and record maintenance; documented processes to improve team efficiency.

PROJECTS

Property Management Tools & Dashboards | React, Node.js, MongoDB

Built bespoke dashboards and internal tools for property managers and developers in Manchester, covering tenancy tracking, maintenance workflows, and portfolio analytics. Designed for non-technical users with clean, accessible interfaces.

Web Scrapers & Analytics Tools | Node.js, Python, Puppeteer

Developed automated web scrapers for data collection and analytics, enabling clients to monitor competitors, track listings, and extract structured data at scale. Built accompanying dashboards for visualising and actioning scraped insights.

Built a custom system for automatic USB dongle detection and configuration, handling serial connections and AT commands. Implemented device monitoring, network initialisation, and proxy service integration for seamless automation and high reliability.

PCM Audio Converter | Node.js, FFmpeg

Custom PCM audio converter leveraging FFmpeg libraries for precise format handling and optimised processing. Designed CLI tools for flexible conversions across multiple audio standards.

KEY ACHIEVEMENTS

WorldSkills UK 2021 – National Finalist: Selected as a national finalist in the WorldSkills UK competition for Web Design & Development, demonstrating advanced technical skills and problem-solving under competitive conditions.

Starbucks Best Partner Nomination – North West: Nominated for Best Partner across the entire North West region, reflecting consistent high performance and team excellence.

EDUCATION

BSc (Hons) Computer Science

2021 – 2025

Manchester Metropolitan University, Manchester, UK

BTEC Level 3 – Software & Web Development

2018 – 2021

Oldham College, Manchester, UK
